

Photo Manager 10

Your free photo assistant

*From the market leader
in multimedia software

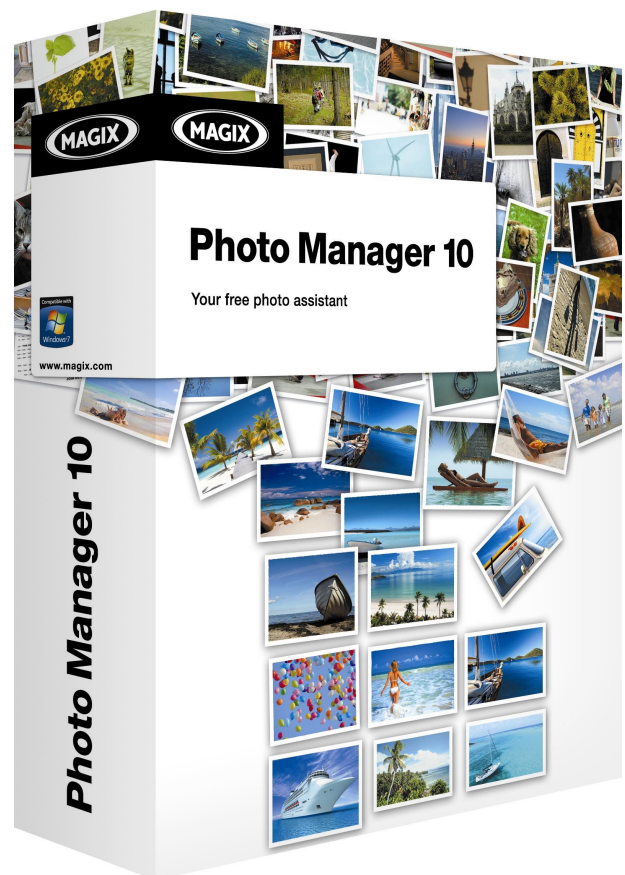

Put an end to your digital photo chaos and organize and manage your personal photo collection with ease. In just a few steps, you can import photos from your camera, optimize and organize them. The edited photos can then be presented on Facebook®, Flickr®, YouTube® and in the free MAGIX Online Album straight from the program. The program's easy-to-use interface offers support in the following areas:

- ✓ Viewing
- ✓ Optimizing
- ✓ Organizing
- ✓ Archiving
- ✓ Presenting

NEW!

- ✓ Upload to Facebook
- ✓ Free Online Album
- ✓ Detect more faces & similar motifs
- ✓ Categories & ratings
- ✓ Improved photo import

The free photo software for your photo collection!

With this free photo software you can easily optimize, manage, archive and present your entire photo collection. It offers numerous functions with a user-friendly interface and is fully equipped for fast import, photo and video clip management, photo editing and presentation.

NEW! Import photos

Even faster photo import from digital cameras, scanners and digital video cameras (WIA) – not only for your photos, but also for video clips and audio files.

In addition, you can import and optimize uncompressed image **data** (so-called raw formats/ RAW) of more than 280 popular camera models**.

View

The clearly laid-out slideshow monitor and the user interface with its dark colors help to highlight your photos.

Click through your favorite snapshots manually or start the automatic slideshow. Specify how long you want each picture to be displayed and select fades. You can also zoom in and out as you please to allow for a detailed or a broader overview.

Image Optimization

Within seconds, you can rotate, optimize, crop and copy your photos, convert them into other formats and reduce their file size.

Easy optimization ranging from auto exposure to red-eye correction allows you to create radiantly beautiful photos with brilliant colors.

- Brightness
- Color
- Contrast
- Sharpness
- Saturation
- Color temperature
- Red-eye correction
- Horizon levelling
- Image section
- Black & white

NEW! Categorize

Sort your photos according to **thematic categories** such as night scenes or beach photos, or manually create your **own categories**. You can assign your images and video clips to several categories at the same time without having to save them multiple times. This way, you can **search in a combination of categories**, allowing you to find the photos you are searching for in record time, irrespective of the folder they are saved in.

Organize

Whether you want to sort or organize your photos, this free photo software enables you to keep track of your entire photo collection.

Unique albums and flexible display and management modes that arrange your media according to logical criteria such as type, size, file name, creation and modification date will help you find your photos quickly and easily.

NEW! Rate photos

Or take advantages of the rating function and **give your photos stars**, in order to sort them according to importance and quality. For example, a single star might be suitable for all of your photos which require correction, while four stars indicate those which are suitable for printing, and five are reserved for those favorites which you would like to use to create special gifts.

Archive

Protect your precious photos!

You can easily and quickly burn your photos and video clips from the program onto a CD or DVD. This allows you to save your memories for the future and to give them to family and friends.

NEW! Search for people

The automatic face recognition feature detects faces and allows you to assign names to them, so you can find photos of specific people.

NEW! Now you can find even more people and apply up to **10** names.

Ideal for creating personal photo albums for birthdays or anniversaries or to capture your children's development over the years.

NEW! Find duplicate and similar photos

Are you looking for winter or flower photos? No problem! Image contents such as color and shape are analyzed in detail, making it possible to compile similar photos.

NEW! Find even more photos! The program now detects the **10** most similar photos.

Also ideal for quickly finding duplicate pictures and removing them from the hard drive.

NEW! Online Photo Album

Impress others with photos and graphics on your very own album website on the Internet and share your experiences with your family and friends.

NEW! Now available as an **HTML 2.0 version** with flexible setting functions and various additional options. Includes iPhone and iPod support.

Online Print Service

Enhance your surroundings with self-made shots of exotic countries, funny family parties and attractive portraits. Take advantage of the **MAGIX Online Print Service** and capture your photos in high quality on premium photo paper.

NEW! Facebook, Flickr & YouTube

Share your most precious, most spectacular, or funniest photos with the whole world and publish them on the popular community websites Flickr® and YouTube®.

NEW! Upload photos directly from the program to your **Facebook®** profile.

It's easy to let your friends and photo enthusiasts view and comment on your digital masterpieces.
