PhotoStory is the number one program for creating slideshows!

For the second time in a row, MAGIX PhotoStory on CD & DVD Deluxe has been awarded the **Gold Award** by the popular review portal TopTen Reviews.

"PhotoStory on CD & DVD Deluxe is our **top pick** for photo slideshow software because it combines the most robust feature set and publishing options with ease-of-use. It is also one of the **best values** because it comes with a photo editor and a music editor."

NEW! Even easier to use

The current version features a **revised design** and **improved program interface**. Straightforward symbols and icons make the program even easier to use, save time and make it easier for users to familiarize themselves with the program.

Thanks to the **dark interface** colors, photos and video clips are displayed in more detail, making it easier to achieve flawless editing results.

A world's first! 3D look on any TV set

NEW! Now anyone can do 3D!

MAGIX PhotoStory on CD & DVD 10 Deluxe is the world's first slideshow program to feature a complete 3D workflow, allowing users to create 3D creations for a true at-the-movies experience.

3D is the most talked-about technology topic of the year and is sure to set a groundbreaking trend for future entertainment media. Now you can enjoy 3D in your own living room, even if you don't own any modern special devices.

Handy: creating 3D slideshows is just as simple as working with 2D footage. Thanks to the internal preview monitor, you can easily determine the type of spatial display at any time.

NEW! 3D slideshows made from regular images

Don't have any 3D images?

Don't worry! With the new, special **3D Slideshow Maker styles** it's easy to enjoy your regular 2D images and video clips in three dimensional space, complete with realistic spatial effects and animations.

Or decorate your classic slideshows: you can choose from among 10 new **3D collages** and over 100 different types of real **3D text**. You can also determine the spatial positioning of regular titles and text animations simply by using the fader. This allows you to place **decorative elements** "in front" of your photos in order to present them in a special way.

NEW! Create real Stereo3D looks yourself

Want to create your own 3D images, but don't own a 3D camera?

Now you can create absolutely realistic 3D experiences with any regular digital camera! All you need is **two photos showing the same motif** that were shot with an offset equivalent to the distance between the eyes. A series of moving snapshots that were shot immediately one after another (e.g. from cars, trains or planes) are just as suitable.

The program then combines the single pictures into a real 3D photo, creating a realistic impression of depth, which can be reduced or increased according to your needs.

Note: The video shows the German user interface, however, the program is available in English.

NEW! Full stereo3D support

Do you already own a 3D camera or are you planning to buy one?

If so, you are sure to benefit from the program's full Stereo 3D workflow, covering everything from import to presentation.

Stereoscopic photos and video clips from any standard 3D camera (e.g. Fujifilm FinePix REAL 3D®) can be imported, edited in detail, optimized with effects and exported in various ways.

NEW! Burn and export for all 3D playback types

The program supports all standard 3D playback and presentation options:

- Standard TV devices and PC screens
- Modern 3D displays and projectors
- CD, DVD, Blu-ray, WMVHD Disc
- Output as video files in HD quality
- Presentation on YouTube®
- For all 3D glasses (red/cyan, polarized filter, shutter technology)

This way, you are completely independent of hardware and all set for unique 3D home theater experiences!

BONUS! A pair of standard red/cyan 3D glasses is all you need to enjoy your 3D slideshow. A pair of 3D glasses is included in the box version.

MAGIX PhotoStory on CD & DVD 10 Deluxe

NEW! Deco elements

Enhance and highlight your images by adding animated decorative elements.

Choose decorative animations including sounds and sound effects from various template categories like fun, comic, frames and customize their size and position any way you please. Have decorative elements follow content in videos ("magnetic objects") or import animated web graphics (GIF) to create unique eye-catchers.

NEW! In addition to the previously included elements, there are more than 30 new decorative elements to choose from. Use the many realistic templates included in the program to bring the original mood of your experiences back to life and relive your vacation, for example! Enhance photos of sunsets by adding a red shimmer or beach shots by adding realistic sun rays.

You can also add some fun and originality to your slideshows with fun animations such as kissing lips, the Formula One flag or devil horns!

NEW! Travel route animation

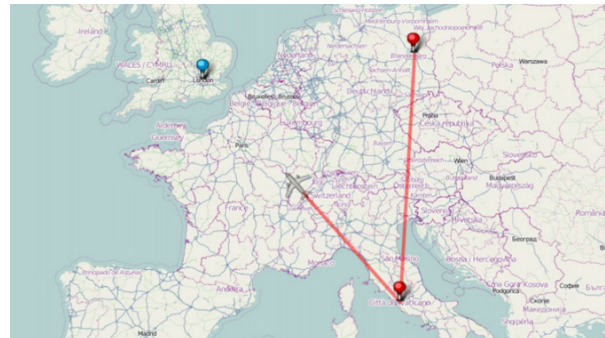

Transform your memories into exciting slideshows and show your audience all the places your journey took you to by using constantly updated online maps of the whole world.

Ideal as animated chapter markers in entertaining vacation slideshows and descriptive travel logs or as background videos in interactive CD/DVD menus.

Simply select the desired means of transportation (airplane, car, bike, etc.), set any number of intermediate stages and adjust the type of route representation and animation effects to your wishes!

NEW!

- More means of transportation (in total: airplane, car, bicycle, bus and pedestrians)
- Markers indicating the different stages of a trip can be hidden
- Route markers can be animated with "growing" lines while walking the distance
- Support for Google Earth coordinates and data of standard GPS trackers (gpx, kml, etc.)

MAGIX PhotoStory on CD & DVD 10 Deluxe

NEW! Selective color alteration

With this new great feature you can create eye-catching effects and add artistic highlights! Change not only the whole image, but also individual color areas. You can, for example, edit only the blues in a photo or video clip to make the sky look brighter or add some red to simulate a sunset.

Dynamic changes: make the Golden Gate Bridge gradually turn green or a bouquet of sunflowers pink.

BONUS! Rescue Your Data!

Afraid you might lose your data? Secure your memories quickly and reliably before it's too late! BONUS in version 10: the backup software **MAGIX Rescue Your Data** valued at \$49.99# included for free!

Back up your precious photos, videos, music files, emails, documents, etc. automatically and without any complications to external hard drives, DVD(s) or other storage media.

Ideal for desktop PCs and netbooks!

According to manufacturer's non-binding recommended price, special offers excluded.

Supported operating systems

- Microsoft® Windows® 7 (32-bit and 64-bit)
- Microsoft® Windows® Vista® (32-bit and 64-bit)
- Microsoft® Windows® XP (32-bit)

System requirements

All MAGIX programs are developed with user-friendliness in mind so that all the basic functions run smoothly and can be fully controlled, even on low-performance computers. Please refer to your operating system's control panel for technical information on your computer.

- **Processor:** 1.83 GHz or higher
- **RAM:** 512 MB
- **Graphics card:** Onboard graphics card with a screen resolution of at least 1024 x 600
- **Hard disk memory:** 1 GB free disk space for program installation
- **Optical drive:** DVD drive (only for installation of the box version)

Optional:

- **Burn:** CD-R/RW, DVD-R/RW, DVD+R/RW or DVD-RAM burner or Blu-ray™ burner for HD quality (MPEG-2 usable after free activation)
- **USB interface:** For data transfer from digital cameras and scanners as well as for output to color printers, digital picture frames and portable devices

Recommended System Requirements

Some advanced program functions demand more of your computer's processing power. To use these functions fully, your system should at least meet the following recommended requirements. Please refer to your operating system's control panel for technical information on your computer.

System requirements for HD video clip editing

- **Processor:** Quad processor 2.83 GHz and higher recommended
- **RAM:** 4 GB
- **Graphic card:** DirectX® 9.0c compatible graphics card, 512 MB graphics card space or more and Pixelshader 2.0, ATI X300, NVIDIA® GeForce® 6600 or similar

System requirements for 3D playback

- Red/cyan glasses required for anaglyph 3D display.
- A special monitor is needed for viewing using polarized filter glasses.
- A 120 Hz monitor or a projector as well as compatible shutter glasses and graphics card are required for shutter playback.

Note: The program's internal online services, e.g. travel route animations and the online update require an Internet connection. The travel route animation feature uses maps from OpenStreetMap. The MP3 sound transmission to Online Album requires Windows Media® Player version 10 or higher.

MAGIX PhotoStory on CD & DVD 10 Deluxe
