MAGIX PhotoStory on CD & DVD 10

More information at www.magix.com

The original

Create multimedia slideshows and impress any audience

Import images from digital cameras, mobile phones, scanners, memory cards, as well as CD tracks, MP3s or any other media from the web.

Enhance even poor-quality snapshots (originals remain unchanged / non-destructive optimization).

Add background music, effects and personalized text. The program then automatically burns your slideshows to disc complete with a DVD player menu, so you can enjoy it on TV & your PC or present it online.

View user interface

Bring your memories to life!

Do you own a digital camera? Then you can turn your most precious experiences into fascinating slideshows in no time at all and impress any audience!

NEW! Even easier to use

NEW! Optimized user interface

The current version features a **revised design** and **improved program interface**. Straightforward symbols and icons make the program even easier to use, save time and make it easier for users to familiarize themselves with the program.

Thanks to the **dark interface** colors, photos and video clips are displayed in more detail, making it easier to achieve flawless editing results.

[View user interface](#)

NEW! Better performance

Experience the quickest and most powerful version of all time!

Benefit from **increased performance**; e.g. real-time effect previews, **quicker loading times** and an **enhanced undo/redo tool** includes storage space economy and practical drop-down menus for the most recent actions.

Operating systems with **64-bit technology** moreover benefit from the additional memory capabilities when editing particularly large slideshow projects.

NEW! Play slideshows more smoothly

Thanks to the increased performance slideshow projects that use multiple effects simultaneously can be played judder-free.

NEW! Zoomable preview monitor

You can now control titles, zooming, tracking shots and decorative elements from outside the image area easier than before.

Precise editing is now child's play thanks to the new zoom function for preview monitors, and the ability to edit outside of the image area.

Simply reduce the photo display in the preview screen, add your titles or effects and animate the elements however you like.

NEW! Export assistant

This practical feature shows you the most important export and archive functions at a glance, it provides additional information and helps you achieve your goals quicker and easier.

View user interface

NEW! Deco elements

Enhance and highlight your images by adding animated decorative elements.

Choose decorative animations including sounds and sound effects from various template categories like fun, comic, frames and customize their size and position any way you please. Have decorative elements follow content in videos ("magnetic objects") or import animated web graphics (GIF) to create unique eye-catchers.

NEW! In addition to the previously included elements, there are more than 10 new decorative elements to choose from. Use the many realistic templates included in the program to bring the original mood of your experiences back to life and relive your vacation, for example!

Enhance photos of sunsets by adding a red shimmer or beach shots by adding realistic sun rays.

You can also add some fun and originality to your slideshows with fun animations such as kissing lips, the Formula One flag or devil horns!
