MAGIX Rescue your Videotapes! 4

More information at www.magix.com

The original from MAGIX

Video recordings are being threatened by all kinds of danger! With the original rescue package from MAGIX, consisting of MAGIX Video Easy* and the practical USB video converter +SCART adapter, you can back up your favorite memories quickly and easily to DVD or Blu-ray Disc™. By the way, the rescue package is suitable for not only VHS, but all other tape formats too, including Video 8, S-VHS, Hi8 and all other tape formats!

Program interface

NEW! Version 4.0:

- 20 new menu templates for DVDs and Blu-ray Discs
- Record your own audio commentary
- Even faster: improved performance
- Completely revised user interface
- Upload videos to Facebook®

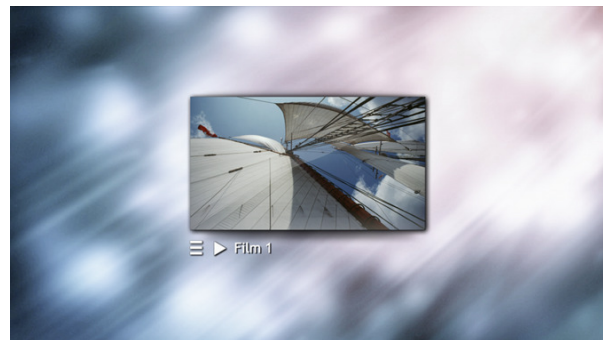

NEW! 20 menu templates

MAGIX Video easy* has been improved with a wide range of animated menu templates for DVDs and Blu-ray Discs. There's templates to suit everyone's tastes - yours included.

The new abstract menu templates give your videos a professional look and offer numerous themes and motifs for appropriate backgrounds.

Lots of the theme-based templates will impress you and your viewers. Ideal e.g. for birthdays, marriages or demanding holiday videos. The finished menus are hard to tell from store-bought movie DVDs or Blu-ray Discs.

NEW! Record your own audio commentary

Like on TV: Record commentary for your videos, just like a voice actor for documentaries on TV. Start the audio recording with a click and add descriptions, interesting background information, important notes or funny comments to any scene you want. Use the built-in microphone in your computer or a separate microphone that you can connect to your PC (e.g. a headset). The devices are, of course, automatically recognized by Video easy*. Now all you need to do is just leave a comment.

NEW! Even faster: improved performance

Our developers were hard at work to make the new version even faster and more efficient. They were successful! MAGIX Video easy* is now even faster than its previous version. Enjoy Video easy's improved performance in many steps of the video editing process, for example, when previewing effects in real time or when loading large video projects. This way, you'll have more time to enjoy your finished videos.

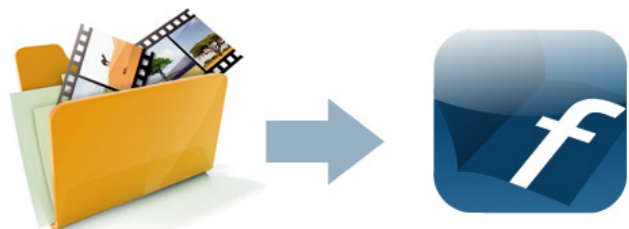

NEW! Completely redesigned user interface

It doesn't just look better: To make video editing with Video easy* even easier and more intuitive, we revised the entire color scheme of the user interface and dialogs, using brighter and friendlier colors. And that's not all: We revised the program's icons, enlarged the buttons, added more fields (for example, to delete clips) and optimized the layout even more.

NEW! Upload videos directly to Facebook®

Facebook®, the world's largest social network, has over 500 million members worldwide. Are you on it? You can upload videos to Facebook® directly from the program share them with friends around the world. This saves you from detours via other video portals, which means your movies will be online faster.

* MAGIX Rescue your Videotapes! Edition
