MAGIX Rescue your Vinyl & Tapes! 4

More information at www.magix.com

Transport your favorite music into the digital age!

Everything you need is included - so you can digitize your LPs right away!

The included premium phono preamp (with cable adapter) ensures a direct connection between the PC and the record player, and is also optimally suited for cassette decks - no stereo system required. This way you quickly and easily get to lossless recordings in just several seconds - whether on a PC or a laptop.

Get started without delay:

Start recording with just one click and listen to the results immediately. Recording volume is set automatically or can be manually adjusted. No worries: Overmodulation, record artifacts, noise, hissing, clicks and humming are history, thanks to automatic sound optimization!

Hey presto!

Securely burned to an audio CD or exported as an MP3 and converted into any number of audio formats.

Common dangers to vinyl & tapes

The life span of your LPs is limited.

- **Scratches**
Who isn't familiar with this? Scratches happen so quickly, but they never go away!
- **Warping**
Storing records on a shelf close to a radiator can warp the material over the years.
- **Wear**
Old needles and record players that were not adjusted correctly can damage records every time they are played.
- **Cracks and breaks**
Due to the material's fragility, LPs are extremely sensitive to breakage after being dropped.

Cassettes also face many dangers

- **Dirt**
Fingerprints and dust diminish the quality of your old favorites.
- **Magnetic fields**
The effect of time, in the form of magnetic fields, can be clearly heard as snaps and pops, which will eventually drown out any other audio!
- **Unpleasant surprises**
Moving, pets, a party – records can suffer damage easily, or your favorite tape can become a "salad". The best songs are lost forever.
- **Devices become unavailable**
Good record players or cassette desks and replacement parts are hard to find these days. Repairs can be costly.

Coming to the rescue

Digitize LPs, save tapes on CD and more.

With **MAGIX Rescue Your Vinyl & Tapes! 4** all of your old favorites can be digitized and secured for the future, archived on your PC, formatted for your MP3 player, or burned to disc - quickly, easily, and in top quality.

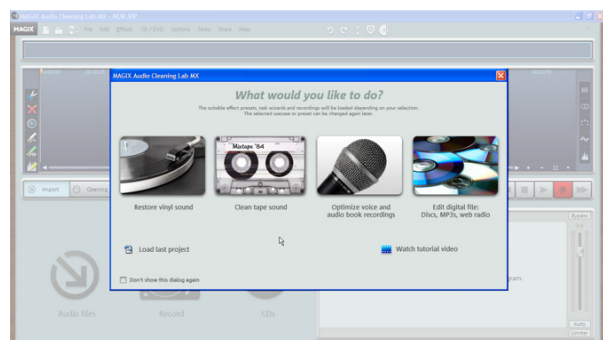

The complete package offers everything your need: a powerful software package and a top-quality phono pre-amp for hooking up directly to your PC.

Audio editing support right from the beginning

The smart program dialog supports you in all your tasks. Whether you want to digitize records, tapes or speech, remove noise from a recording or optimize the sound of an MP3 file.

The audio program automatically adjusts all settings depending on what you want to do, so you can start recording or optimizing your sound immediately and won't lose time clicking through dialogs and adjusting program settings!

NEW! Turbo Tape: Easily restore cassette recordings with High Speed Dubbing

Quickly digitize old cassette recordings with High Speed Dubbing. Your double-speed recordings will be imported into the included **MAGIX Audio Cleaning Lab MX** at the right speed and can then be optimized and freshened-up with top-quality audio editing tools. Save your favorite songs from the old days and enjoy your music where ever you like!

EASIER! Fully automatic noise removal

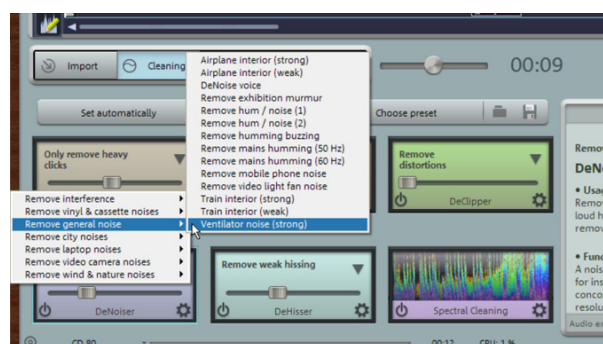

Useful assistants make operation even simpler and more goal-oriented. Together, the fully automatic Cleaning Assistant as well as the improved step-by-step assistants ensure perfect sound cleaning. Don't waste your time with complicated editing stages - lean back and relax while the software does the work for you - you'll be impressed by the results!

IMPROVED! Over 60 new sound optimization presets

Use more than 60 brand-new handy presets for fast, effective sound optimization to effortlessly remove bothersome background noise from various sources.

- Eradicate traffic noise
- Remove street sounds
- Lower environment backdrop
- Get rid of audio interference from electronic devices
- and more
